CLAIM AMENDMENTS

1	1. (previously presented) In combination
2	a coke-oven door with a chamber having an upwardly closed
3	continuous annular door frame that has an outer planar seal face,

an annular comb-shaped seal strip fixed on the door body and formed with an annular seal edge engaging the door frame when the door is closed, and with slots spaced and dimensioned such that the seal strip can deform to fit the seal edge to irregularities on the seal face.

a door body securable to the door frame, and

- (previously presented) The combination according to claim 1 wherein the comb-shaped seal strip is secured by screws and retaining washers on the door body.
- 3. (previously presented) The combination according to claim 1 wherein the comb-shaped seal strip is secured by screws and a retaining bar on the door body.
 - 4. (previously presented) In combination a coke-oven door with a chamber having an upwardly closed continuous annular door frame that has an outer planar seal face, a door body securable to the door frame.

- 2 - 23302AM3.WPD

1

- annular seal elements fixed on the door body, engaging the door frame when the door is closed, having ends that fit sealingly together,
- flexible end seals between the ends, and a sealing agent coating the end seals.

5 - 6. (canceled)

- 7. (previously presented) In combination
 a coke-oven door with a chamber having an upwardly closed
- continuous annular door frame that has an outer planar seal face,
 - a door body securable to the door frame,
- seal elements fixed on the door body, having fitted-
- together ends, and forming an annular seal edge engaging the seal
- face of the door frame when the door is closed, and
- s flexible end seals between the ends of the seal elements
 and each formed of two plates that are connected together at their
 ends at round heads.
- 8. (currently amended) The combination according to claim 7, further comprising
- filling in a space between the seal plates and [[and]]

- 9. (previously presented) The combination according to claim 8 wherein the filling is an elastic material.
- 1 10. (canceled)
- 1 11. (previously presented) In combination
- a coke-oven door with a chamber having an upwardly closed continuous annular door frame that has an outer planar seal face,
- a door body securable to the door frame,
- seal elements fixed on the door body, having fitted-
- together ends, and forming an annular seal edge engaging the seal
- face of the door frame when the door is closed, and
- a T-part between the ends of the seal elements.
- 1 12. (previously presented) The combination according to 2 claim 11 wherein the T-part is double.
- 1 13. (previously presented) The use of the comb-shaped 2 seal strip according to claim 1 for retrofitting on and repair of 3 an existing coke-oven door.
